

Tennis Coaching & Court Booking Marketplace

Full Demo Script — Player (LINE LIFF) + Coach (Web Portal) | MVP: Mock ledger, location_text

Repo: github.com/GRITui/tennis-line-marketplace | Stack: NestJS + Next.js LIFF + Next.js Admin + Supabase + Redis

1. System overview (Option A bundling)

Three sides: **Players** book inside LINE OA LIFF, **Coaches** publish bundled slots (coaching + court fee in one price) via web portal, **Courts** are pre-bundled into slots. Funds sit in **ESCROW_HELD** until 2h after session end, then release minus platform fee. 5-minute Redis hold prevents double-booking. Post-session **Player Passport** locks progress to LINE UID to prevent disintermediation.

2. Player journey — LINE LIFF (apps/liff-player)

Step	Screen / Action	Expected result
P1	Open LINE OA → tap Book → LIFF webview. Filter date / location_text / surface (HARD/CLAY/GRASS).	List of OPEN slots with coach, court, bundled_price.
P2	Tap slot → 5-min hold starts (Redis SET slot:{id} NX EX 300). Countdown shown.	Slot → HELD, others see it locked.
P3	Mock checkout → Pay. Idempotency-Key prevents double charge.	Booking ESCROW_HELD, slot BOOKED.
P4	LINE Flex Message receipt + calendar invite.	Player sees booking in My Sessions.
P5	Post-session: LINE push 'Coach updated your progress log' → Passport.	Ratings, focus_areas, notes visible, locked to LINE UID.
P6 rainout	LINE 1-click Refund or Reschedule token.	REFUNDED or new slot, token single-use.

3. Coach journey — Web Admin Portal (apps/coach-admin)

Step	Screen / Action	Expected result
C1	Login → Dashboard → Publish Slot: date, time, court, bundled_price.	Slot OPEN. Overlap (coach or court) rejected with 409.
C2	Manual booking: phone/walk-in → create MANUAL_ADMIN booking.	Slot locked without LINE flow.
C3	Bookings list: HELD / BOOKED / ESCROW_HELD badges.	No double-book; held_expires_at visible.
C4	Post-session 60-sec form: focus_areas, rating 1-5, notes, media_url.	progress_logs row → triggers LINE push to player.
C5	Payouts: amount_total, platform_fee (15% default), coach_payout.	ESCROW_HELD → COMPLETED after end_time+2h via cron.
C6 rainout	Cancel → Refund or issue reschedule_token.	Player notified via middleware.

4. Live demo script (8 min)

0:00 — Show architecture slide (this PDF p.1). 0:45 — **Coach**: publish Sat 10:00–11:00, Hard court A, ■1,200 bundled. Show overlap rejection by trying same court 10:30. 2:00 — **Player**: open LIFF, filter Sat + HARD, tap slot, show 5-min timer. 3:00 — Mock Pay → show Flex receipt JSON + My Sessions BOOKED. 4:00 — Supabase: bookings row ESCROW_HELD, escrow_release_at = end+2h. 4:45 — **Coach**: submit Passport form (Topspin, rating 4). 5:30 — **Player**: receive LINE push, open Passport. 6:15 — Rainout: coach cancels → player taps Reschedule token → new slot. 7:00 — Payouts: show 1,200 – 180 (15%) = 1,020. 7:30 — Q&A: Omise + geo post-MVP.

5. MVP scope vs post-MVP

Area	MVP (this demo)	Post-MVP
Payments	MOCK provider, instant ESCROW_HELD	Omise PromptPay QR + webhooks
Location	location_text filter	PostGIS location_geo radius search
Backend	NestJS scaffold + Supabase + Redis holds	Full escrow cron + Supabase Function fallback
Frontend	Next.js LIFF + Coach Admin renames	Design polish, Thai i18n

6. Test accounts & links

Coach: coach.demo@example.com / Coach Demo (users.role=COACH). Player: LINE UID link in demo (users.role=PLAYER, line_uid). Courts seed: Hard Court A (HARD, Sathorn), Clay Court B (CLAY, Ari). Commission: 15% + 0 flat. Branch: **feat/marketplace-foundation**. Migration: **supabase/migrations/0001_marketplace.sql**.

Prepared for live walkthrough. Keep this PDF open alongside LIFF-player and coach-admin tabs.
